

To Whom It May Concern:,

Nine months ago, we were like many other schools districts, struggling with ways to keep our community, parents and students informed about our many and varied activities while also maintaining a frugal IT budget and asking our in-house technicians to learn how to post web pages quickly and accurately. Needless to say, our results, though admirable for amateurs, clearly displayed our lack of expertise.

We began a process of soliciting proposals from web site designers, and after hearing glowing reports from the Somerset Hills School District, we settled on **isite5**. I cannot tell you how happy we are with the product, notably Toto Tasso, has provided us. He listened, suggested and accommodated to meet our many varied needs, resulting in a web site which I feel is a leader in functionality and design among all school district web sites in New Jersey and nationally. You can check out the results at <http://www.hopatcongschools.org>.

I recommend Torquato Tasso to you for your IT and web needs without qualification or reservation. If you need any additional information, please contact me.

Sincerely,

Timothy J. Frederiks
