To whom it may concern,

Isite5 has been doing work for our company for about two years. They came to us as a referral from another customer who had used him. He designed our site and has also been doing work for us by designing our client's sites.

Toto Tasso from isite5 is a very talented artist, graphics designer and web site designer. We have found by doing web sites for the last 5 years that these are three qualities that are required to have a web site that is not only nice looking but easy to navigate and use.

Please feel free to call if you have any questions.

Sincerely,

Steven Skuopacki
